

Biodiversity

Common points :

- 1-** Planting trees
- 2-** Protect extinct species like bees.
- 3-** Learn the children to protect the animal habitat.

Good practices :

- 1-** Breeding bees in schools.
- 2-** Plantations for bees.
- 3-** Planting trees

Transferable actions:

- 1-** Bee breeding .
- 2-** Replanting the trees that are destroyed during the year.
- 3-** Compost.
- 4-** Frogs that keep the balance between the nature and the human activities.

Communication between schools.

1- There are already invented ways to communicate through the social media like e-mail, facebook, instragram, etc. We will try to use them to spread awareness within people so they would start to use our methods as everyone should do! In few minutes you will see a video that we made to explain and spread in social media so our work will be noticed and we hope that the project will help the nature.
